EDGE TRIM

EDGE TRIMS

Individual Metal Clips Retain a Permanent Grip

Edge Trim is a flexible PVC trim with individual internal metal clips and gripping tongues to provide a stronger grip.

Strong Gripping Tongue

Many Applications

- Sharp Edges
- Trucks
- Boats
- Forklifts
- Golf Carts
- Helmets
- Truck Cabs
- Fiberglass
- Computer Cabinets
- Tractor Cabs
- Riding Mowers
- Machinery Guards
- Sheet Metal
- Playground Equipment
- And Many More

Custom Materials:

Rubber-Lok can be ordered in special compounds based upon your specific application requirements.

Custom Colors:

Rubber-Lok can be ordered in custom colors to match your special needs. You can also highlight your trim with special decorative finishes.

Custom Profiles:

Special shapes or modifications to Rubber-Lok can be developed in order to meet your needs.

Custom Length:

Rubber-Lok can be ordered in specific cut lengths. Minimum quantities apply.

Product Specifications:

Recommended temperature rating for general applications: -29°C. through +70°C.

Base Material:

Vinyl (PVC), Hardness: 85 Durometer (Shore A)

Internal Clip Material:

Aluminum or Steel

EDGE-GUARD

Edge-Guard is a pre-glued, flexible plastic trim with a mylar or clear cover. It gives a beautiful, finished appearance.

Many Applications

- Car Door Edges
- Furniture
- Vending Machines
- Running Boards
- Fender Flares

Product Specifications:

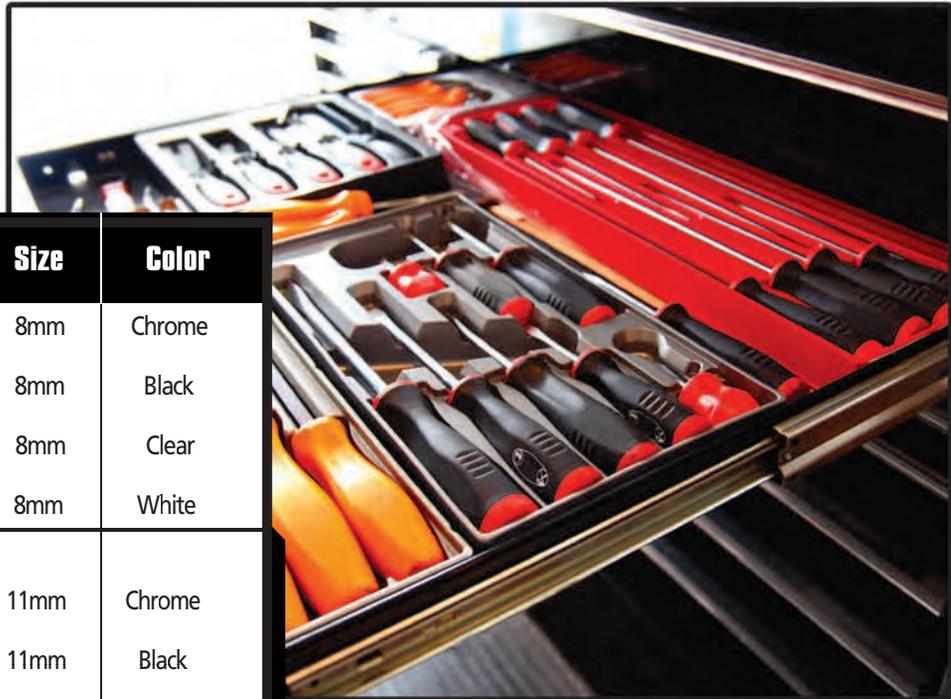

Recommended temperature rating for general applications: -29°C. through +70°C.

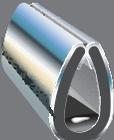

Base Material:

Vinyl (PVC), Hardness: 97 Durometer A
 Decorative Finish: Mylar Overlay
 White, Hardness: 88A Durometer

Adhesive:

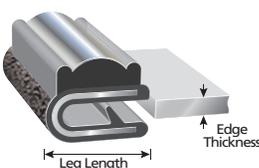

Hot Melt Adhesive
 Optional Butyl Adhesive Sealant

RUBBER EDGE TRIM

EDGE TRIMS

Very Flexible to Fit Tight Radius

Pre-Applied Butyl Sealant or Hot-Melt Adhesive

Rubber Edge Trims are available in either **EPDM** or **Neoprene**, these two different materials are designed to fit your application perfectly.

Neoprene is a well proven proprietary blend that weathers well, has very good resistance to abrasion, flex cracking, alkalis, and acids and is best used in applications where flame resistance is a requirement. This material has moderate resistance to oils and gasoline. Neoprene is generally considered an excellent all-purpose material with a solid balance of properties and few limitations. However, expect poor resistance to aromatic and oxygenated solvents and limited flexibility at low temperatures. Hardness:70 Durometer (Shore A) Service temperature ranges from -40°C. to 107°C.

EPDM has excellent performance characteristics. EPDM (Ethylene-Propylene-Diene-Monomer) is best known for its excellent ozone, weathering, and aging resistance. It also has excellent water and steam resistance, maintains its flexibility at low temperatures, features excellent resistance to alkalis, acids, and oxygenated solvents, and is very color stable. It is not recommended for resistance to oil, gasoline, and hydrocarbon solvents. EPDM is found in a wide range of applications and is excellent for use outdoors.

Hardness: 70 Durometer (Shore A)

Service temperature range per spec and per vendor from -40°C. to 100°C. for EPDM and Neoprene. Short term is -40°C to 107°C.

Butyl Sealant can be ordered pre-applied and provides excellent sealing characteristic with good heat performance.

Service temperature ranges from -29°C. to 70°C.

Hot Melt Adhesive can be ordered pre-applied and to provide a stronger grip with good heat performance. Not available with EPDM.

Recommended temperature rating from -29°C. to 70°C.

J-CLIP AND SEWABLE UPHOLSTERY TRIM

EDGE TRIMS

Upholstery Trims and J-Clips

are manufactured out of a sewable non-break material. Fabric can be sewn to these parts and used to keep the material tight to the seat frame once in place.

UPHOLSTERY TRIM

Product Specifications:

Recommended temperature rating for general applications: -29°C. through +70°C.

Outer Coating Material:

Vinyl (PVC), Non-break. Hardness: 85 Durometer (Shore A)

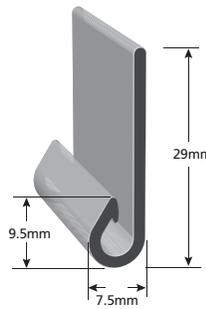

Internal Clip Material: Aluminum

TRIM SEAL

Seals and Protects against Weather Damage!

Trim Seal is a flexible PVC Trim with a sponge rubber bulb seal attached to provide a secure seal for a variety of applications.

Check out our How to Install video at: www.trim-seal-install.info

Product Specifications:

Recommended temperature rating for general applications: -29°C. through +70°C.

Outer Coating Material:

Vinyl (PVC), Hardness: 85 Durometer (Shore A)

Internal Clip Material:

Aluminum or Steel

Flammability & Code Compliance:

Vinyl: FMVSS 302
FAA/FAR 23.853
UL 50E
UL 94HB

FILE# MH49032

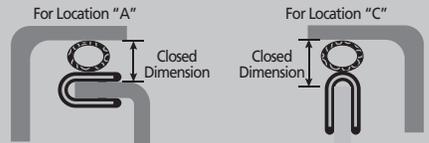

HOW TO ORDER

Determine **BULB COLOR**

OW Off White **B** Black = No callout necessary

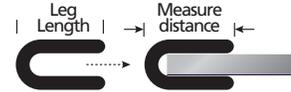

Determine **BULB SIZE** based on closed distance between door and jam.

1.5 x Closed dimension = **BULB SIZE** needed.
(Example: Closed dimension is .50 then 1.50 x .50 = .75 Bulb Dia.)

Select **TRIM SERIES**

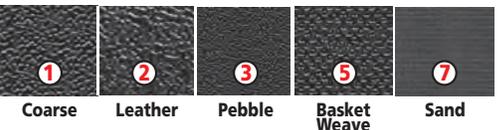

Determine how far trim is to be inserted.

Determine **TRIM COLOR** to best suit application

Determine **TEXTURE** to best suit application

Determine edge **THICKNESS** Example .5mm=x1/64

Select **BULB LOCATION** best to suit.

Typical Applications

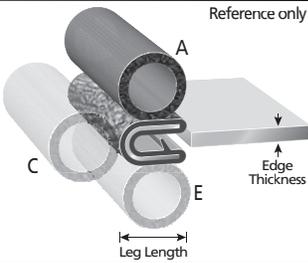

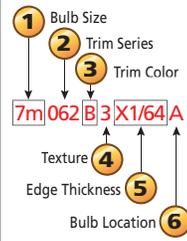

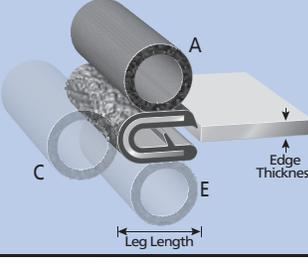

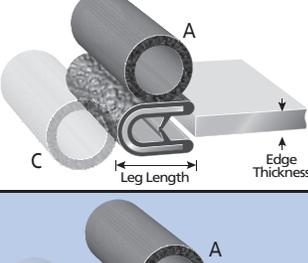

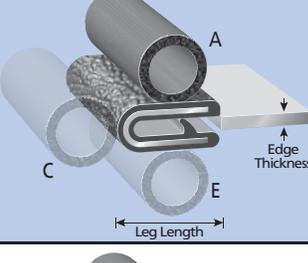

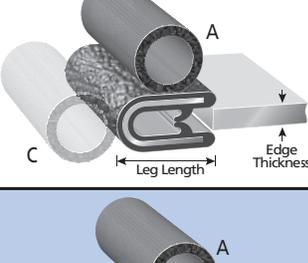

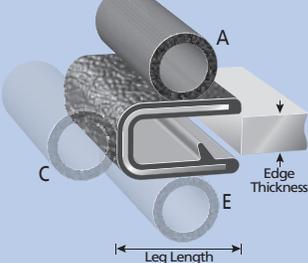

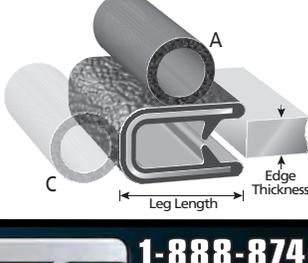

* A-B or D-E non-standard location, special order, non-returnable

Part Number Example

1 **2** **3** **4** **5** **6**
OW **3** 100 **B** 3 **X1/8** **A**

Many Applications

- Boat Hatch Seals
- RV Compartments
- Door Seals
- Tonneau Cover Seals
- Tool Box Seals
- Many More

LIP GUARD

Lip Guard is a plastic trim with a mylar cover and peel-off tape. This pliable trim comes in chrome and black and has the durability to meet interior or exterior design requirements. Paintable Lip-Guard can be painted to specific color using vinyl base paint.

Many Applications

- Running Boards
- Unfinished Edges
- Truck Bed Covers
- Car Fenders
- Spas
- Camper Shells
- Fender Flares

Product Specifications:

Recommended temperature rating for general applications: -29°C. through +70°C.

Base Material:

Vinyl (PVC)

Decorative Finish:

Mylar Overlay

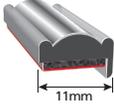

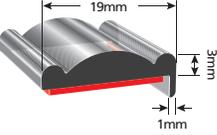

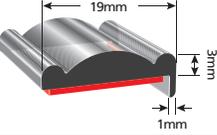

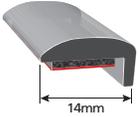

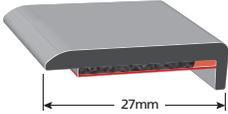

Adhesive:

3M™ Acrylic Foam Tape with peel-off liner

Paintable Lip Guard is...

- Designed to replace the aluminum trim on fiberglass shells
- Can be painted with vinyl based paint
- Designed for camper shells and running boards
 - Pliable and durable to meet exterior design requirements

Lip Guard®	Part No.	Size	Color	Hardness
	LGC	11mm	Chrome	67D
	LGB	11mm	Black	97A
	LGB3/4	19mm	Black	97A

	JLGB	27mm	Black	67D

PLASTIC PROFILES

DRIP RAIL

Drip Rail is a flexible plastic peel 'n stick rain gutter that eliminates time consuming installation of aluminum rain gutters.

- Easy to install with **3M™** Acrylic Automotive Grade Foam Tape.
- Bonds above windows on your truck, car, RV or boat to channel off water.
- Eliminate streaks from dew and drizzle.
- Control water runoff.

Product Specifications:

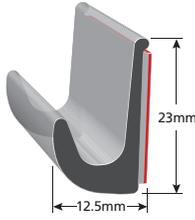

Recommended temperature rating for general applications: -29°C. through +70°C.

Adhesive:

3M™ Acrylic Foam Tape with peel-off liner

Base Material:

Vinyl (PVC), Hardness: 85 Durometer (Shore A)

Profile	Part No.	Color
	DRB	Black
	DRW	White

E-Z Peel 'n Stick Rain Gutter with **3M™** Acrylic Foam Tape

Durable PVC Plastic

Special 'J' design to Channel away water

Check out our How to Install video at: www.drip-rail-install.info

Custom sizes and colors are available on request. Minimums apply.

CARPET TRIM

Carpet Trim is a flexible PVC trim with a peel and stick carpet edge to prevent carpet frays while providing a finished look.

Product Specifications:

Recommended temperature rating for general applications: -29°C. through +70°C.

Base Material:

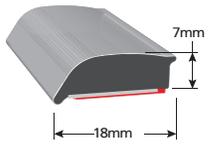

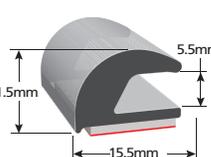

Vinyl (PVC)

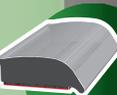

Finish:

Gloss Black

Adhesive:

FOR A WATER
TIGHT SEAL!

Rubber Seals come in a variety of specially designed shapes, made from custom formulated EPDM closed cellular sponge.

RUBBER SEAL DISCLAIMER: Due to a constant effort to update our Rubber Seal products, specifications are subject to change without notice and without incurring obligation. Because we cannot anticipate or control the many different conditions which this information and our products may be used, Trim-Lok does not guarantee the applicability, accuracy or the suitability of a product in any given situation. Users should conduct their own tests to determine the suitability of each product for a particular application. The products described here are sold without warranty either expressed or implied and the buyer assumes all responsibility for loss or damage arising from the handling and use of our products.

CLEANING AND APPLICATION INSTRUCTIONS

Regardless of bonding surface, it must be clean and free of surface contaminants such as oil, grease, mold release and dirt. Most bonding failures are due to improperly cleaned surfaces. Prior to applying any adhesive, clean surface with 50/50 isopropyl alcohol and water solution.

Product Specifications:

Recommended temperature rating for general applications:
-29°C. through +70°C.
(EPDM)

Application:

For optimum performance use
25% - 40% maximum compression
with 25% being optimum.

Resistance Ratings:

Excellent resistance to water absorption, ozone, sunlight aging, low temperature, and compression set.

Flammability and Code Compliance:

FMVSS 302
UL 50E
UL 94HB

Adhesive Options

Choose the tape that fits your needs

"HT" GENERAL PURPOSE PRESSURE SENSITIVE ADHESIVE

This acrylic based adhesive is best used to hold the rubber seal in place while installed in a static application or compressed between two stationary objects. May be used in some light duty dynamic applications against a variety of substrates. Good heat performance -29°C. to +70°C.

Please Note: During application ambient temperature must be above 16°C.

"BT" 3M™ HIGH STRENGTH TAPE SYSTEM

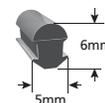

The ultimate bond between the rubber and substrate. Creates a moisture barrier and air tight seal between rubber and substrate. Highest peel and shear resistance, can be used under high loads of stress and force. Has low initial tack for easy re-positioning during installation and requires 72 hours of cure time for full bond strength. Good heat performance -29°C. to +70°C.

See our How to Install video at: www.rubber-seal-install.info

AMHC-12B100B7X3/16C-25	7.5 m per Bag	20 Packs per Box
AMHC-4100B3X1/16C-25	7.5 m per Bag	10 Packs per Box

OPTION 2

This packaging option is a hangable poly bag that captures and protects the parts. This option is also available in for those customers that need a private label attached.

Hanging Polybag Option

LOCKING GASKET

Locking Key (Part 2)

One-Piece Locking Gasket

Two-Piece Locking Gasket (Part 1)

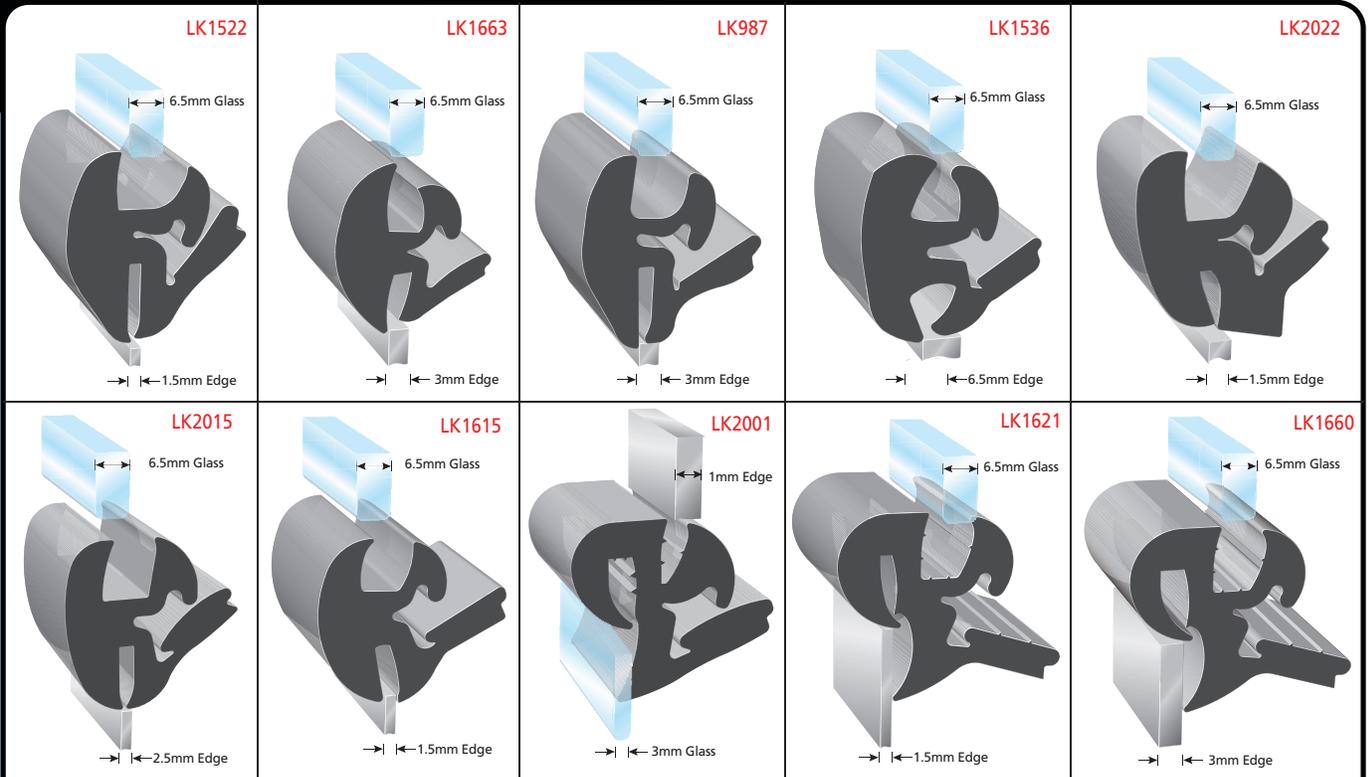

Dense EPDM Rubber

One-Piece Installation Tool
Item #365-0003

Locking Gasket is an EPDM dense rubber extrusion designed to lock in the installation of stationary windows or windshields. Locking Gaskets provide a secure seal between a metal or fiberglass body panel and a glass or plexiglas window. Available in one-piece and two-piece styles with a locking key, and are highly resistant to numerous environmental conditions. Slip coating available upon request.

- Resistance to Ozone — Excellent
- Water Absorption — Excellent
- Sunlight Aging — Excellent
- Low Temperature — Excellent
- General Temperature Rating -40°C. to +100°C.
- Flammability and Code Compliance — FMVSS 302

ONE-PIECE LOCKING GASKETS

	Part Number	Glass Panel Thickness	Body panel thickness	**Minimum recommended clearance between glass and edge	Overall Height	Minimum recommended radius of panel opening	Weight per Kg.
<p>** Minimum Recommended Clearance</p>	LK1522	5mm - 6.5mm	1mm - 1.5mm	7.5mm	27mm	63.5mm	0.125 kg
	LK1663	5mm - 6.5mm	2.5mm - 3.5mm	5.5mm	23mm	38mm	0.089 kg
	LK987	5mm - 6.5mm	2.5mm - 3.5mm	6.5mm	27.5mm	63.5mm	0.112 kg
	LK1536	5mm - 6.5mm	5mm - 6.5mm	10.5mm	27mm	89mm	0.102 kg
	LK2022	6.5 mm - 8mm	1mm - 2mm	7 mm	24.5 mm	63.5mm	0.147 kg
	LK2015	5mm - 6.5mm	2mm - 2.5mm	6.5mm	24. mm	63.5mm	0.107 kg
	LK1615	5mm - 6.5mm	1.5mm - 2.5mm	7.5mm	23mm	63.5mm	0.125kg
	LK2001	3mm - 3.5mm	1mm - 1.5mm	*4mm	25.5mm	63.5mm	0.130 kg
	LK1621	5mm - 6.5mm	1mm - 2mm	*3.5mm	24mm	51mm	0.118 kg
	LK1660	5mm - 6.5mm	2mm - 3.5mm	*3.5mm	25.5mm	51mm	0.133 kg

* Offset dimension between glass and body panel.

LOCKING GASKET

INSTALLATION

1. Secure Locking Gasket to body panel.

2. Lubricate Locking Gasket. Then slide glass in bottom first.

3. Finish working rubber around glass with tools found on pages 40-41.

See page 40-41 for more information on Locking Gasket installation tools.

TOOLS AND ACCESSORIES

(A) Instant Adhesive

A superior adhesive bond on "hard to glue" surfaces that creates a secure seal on corners and joints. It protects TRIM-LOK products against harsh conditions by bonding ends securely. This product bonds rubber, plastic, fiberglass, metal, wood, paper, leather, and foam. It cures in 0 - 0.25 seconds with a temperature rating of -7°C. to +66°C., with full cure in 24 hours.

20g net weight per bottle
STOCK #4401TL

(B) Straight Edge Clipper

A compact hand-held tool that creates a professional appearance on most applications. Product comes with 2 replacement blades.

(2 blades/pkg.)

STOCK #WCSC1

Replacement Blades #RBA

(C) EC-1 Tool

General purpose cutter.
STOCK #EC-1

(D) Handheld Roller

A handheld roller to assist with the correct application pressure needed for all Rubber Seal adhesives.

STOCK #HR-1

(E) Ball End for 1-piece Locking Gasket

This tool has a small, round steel ball on the end. Once the steel ball is inserted down into the rubber gasket, it is very difficult for it to come out. If it should slip out of the gasket, there is less of a chance you will scratch the paint of the vehicle you are working on.

STOCK #365-0007

(F) Lock Strip Insertion

Features off-set handle to keep hands away from glass and two double end tips that will fit most applications. The unique design allows the tip to swivel 90 Degrees. Intended for 2-piece locking gaskets.

STOCK #365-0008

(G) Plastic Installation Tool

Specifically designed to ensure a safe, easy, and efficient installation of one piece Locking Gaskets for stationary windows and other glass applications.

STOCK #365-0003

K

H Rubber Seal 90° Miter Tool
Heavy-duty construction provides clean, 90° miter cuts with minimal effort. Blade opens 11mm. Larger rubber seal parts may be cut by compressing the overall height.
STOCK# GS849RS
Blade Replacement #GS848RS

I 90° Miter Tool
A perfect miter with the close of your hand! This tool is designed to miter, notch or trim a variety of materials, including metals, plastics, and mitering metal core trim. Blade opens 6.35mm.
STOCK #GSS851
Blade Replacement #GS850

J Locking Gasket Tool Kit
Specifically designed to ensure a safe, easy and efficient installation of Locking Gaskets for stationary windows and other glass applications.
STOCK #365-0000

K Pneumatic Hammer
This palm size pneumatic hammer applies trims and seals where speed and high volume installations are essential. This product eliminates the need for a variety of cumbersome hammers and mallets.
STOCK #AH-1
O-Ring Replacement Kit #AS-OK-151
Tip #AH-T-15-SS

L Gasket Rope Insert
This handy gasket rope insert tool is designed to ease the rope under the lip and seat it in the groove of the gasket. It comes with a sturdy 6.10 meter rope.
STOCK #365-0005

M Pigtail for 1-piece Locking Gasket
It can be difficult to fold the self-locking rubber into the locking part. This tool solves this problem by rolling the locking lip into the body easily.
STOCK #365-0006

ACCESSORIES

Utilizing the Right Material

EPDM (Ethylene-Propylene-Diene-Monomer) is well known for its excellent ozone, weathering and aging resistance. It also has excellent water and steam resistance, maintains its flexibility at low temperatures, features excellent resistance to alkalis, acids and oxygenated solvents, and is very color stable. It is not recommended for resistance to oil, gasoline and hydrocarbon solvents. EPDM is found in a wide range of applications and is excellent for outdoor use.

Neoprene (Polychloroprene) has moderate resistance to oils and gasoline. It features good flame resistance, weathers well and has very good resistance to abrasion, flex cracking, alkalis and acids. However, expect poor resistance to aromatic and oxygenated solvents and limited flexibility at low temperatures. Neoprene is generally considered an excellent all-purpose elastomer with a solid balance of properties and few limitations.

Nitrile (Acrylonitrile-Butadiene) has very good oil and abrasion resistance to alkalis and acids. Nitrile must be specially compounded for resistance to ozone, sunlight and natural aging. It has poor resistance to oxygenated solvents. Nitrile is superior to neoprene in oil and solvent resistance, but is not recommended for applications where it is exposed to severe weathering.

Nitrile PVC provides premium performance and long-term reliability in very harsh and corrosive environments. Has exceptional resistance to heat aging and a broad range of fuels, solvents and chemicals makes it ideal for many demanding aerospace, automotive and industrial applications. Fluoroelastomers also offer excellent resistance to weather, ozone, oxygen and sunlight, and are inherently more flame retardant than hydrocarbon rubbers. Fluoroelastomers have poor resistance to ketones, ester, ethers, amines and aqueous bases (e.g., ammonia and sodium hydroxide).

TPE (Thermoplastic Elastomers) are materials that have the properties and performance of rubber, but are processed like thermoplastics. Performance properties are similar to conventional thermosets such as EPDM or neoprene. TPE has good direct flame resistance as well as aliphatic and aromatic hydrocarbon solvents, oil and gasoline.

PVC has excellent impact strength, good resilience, tensile strength, abrasion resistance and maintains flexibility at lower temperatures. It is not the polymer of choice when resistance to oil, gasoline and hydrocarbon solvents is required.

Silicone Rubber offers good resistance to extreme temperature, being able to operate normally from -46°C. to 260°C.+ while retaining flexibility. And, at extreme temperatures, silicone's tensile strength, elongation, tear strength and compression set can be far superior to conventional rubbers.

CLEANING AND APPLICATION INSTRUCTIONS

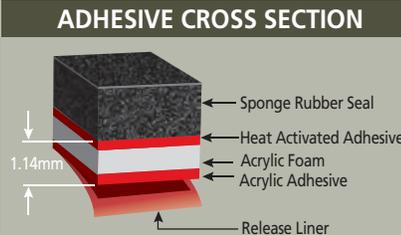

Regardless of what bonding surface you apply the gasket to, it must be clean and free of surface contaminants such as oils, greases, mold releases and dirt in general. Most bonding failures are not due to the adhesive failing but, instead the failure to properly clean the surfaces. Prior to applying any of these adhesives, clean surface with 50% denatured alcohol and 50% water solution.

Choosing the Right Adhesive

ADHESIVE OPTIONS

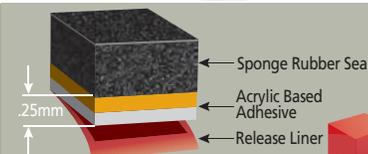

BT 3M™ BONDED TAPE SYSTEM

The ultimate bond to the rubber and the ultimate bond to the substrate. Specifically designed to perform in dynamic applications, this engineered tape system creates a moisture barrier and air tight seal between rubber and substrate. Highest peel and shear resistance, low initial tack for easy repositioning during installation and needs 72 hours of cure time to come to full bond strength. Good heat performance -29°C to +70°C.

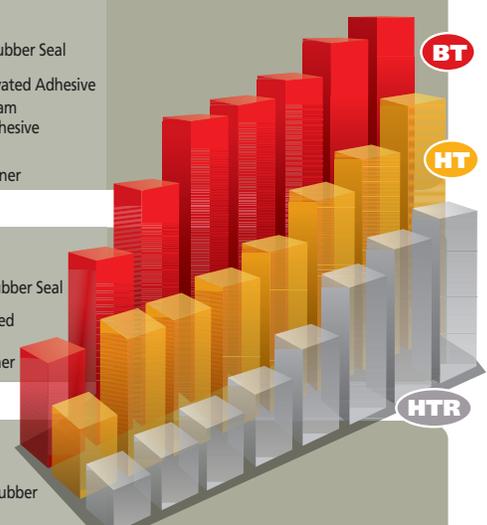

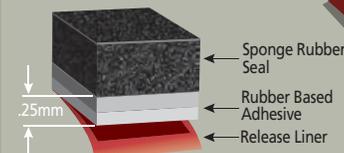

HT STANDARD PRESSURE SENSITIVE ADHESIVE

This acrylic based adhesive is best when used to hold the rubber seal in place in a static application or compressed between two stationary objects. May be used in some light duty dynamic applications against a variety of substrates. Good heat performance -29°C to +70°C.

HTR HIGH TACK PRESSURE SENSITIVE ADHESIVE

This rubber based adhesive is best when used to hold the rubber seal in place while installing in static applications or compressed between two stationary objects. HTR has better initial tack as well as adhering to some difficult bond surfaces such as polypropylene and polyethylene. Heat limitations -29°C to +54°C.

Trim-Lok's Quality is First!

Since 1971 customer satisfaction has been our number one priority. Our objective is to ship quality and reliable products to all of our valued customers. Our goal is to maintain a Quality Management System that meets or exceeds the requirements of ISO/TS 16949 and ISO 9001.

Trim-Lok's Service

Trim-Lok's Mission is "To be the leader and trusted supplier of choice for innovative Trim and Seal solutions." With over 40 years of consistent growth Trim-Lok has proven to its customers that premier customer service and quality is the priority. Trim-Lok has provided support to their customers by shipping on time for both off-the-shelf and custom extruded parts.

Trim-Lok Custom Fabricated Solutions

Trim-Lok brings the most experienced team in the industry toward the development of custom fabricated solutions across all of the industries it serves. Trim-Lok's product development assistance unifies industrial design, engineering rigid prototyping and manufacturing to serve their customers. Trim-Lok's product development team brings high caliber mechanical design, excellent materials knowledge, and strong manufacturing expertise. All of our processes involve continuous improvement and our employees are recognized for their contributions to this end. All aspects of Trim-Lok from custom design to engineered solutions to on-time deliveries are centered around our highest priority – Keeping our customers satisfied.

TRIM-LOK'S CAPABILITIES & DELIVERABLES

MATERIALS

Rubber

- EPDM (Ethylene-Propylene-Diene Monomer)
 - Sponge and various durometers of Dense
- Nitrile (BUNA-N) - Dense
- Nitrile PVC (N/PVC) - Sponge
- Neoprene (CR, Polychloroprene)
 - Sponge and various durometers of Dense
- Silicone (SI) - Sponge and various durometers of Dense

Plastic

- TPE, TPO, TPR, TPU, TPV
- PVC - Flame Resistant
- PVC - Flexible and Rigid
- Polyethylene (HDPE, LDPE, LLDPE)
- Acrylonitrile-Butadiene-Styrene (ABS)
- Polypropylene
- Polycarbonate

- Single and Co-Extrusions
- High Tolerance Splicing
- Plastic Welding
- Pressure Sensitive Adhesives
- Continuous or Cut to Length
- Custom Design/Profile
- Custom Kit Assemblies
- Private Label Packaging
- Custom Color Matching
- Notching
- In-line Printing
- Mitered Corners and Frame Assemblies
- Hot Bonded Corners
- Cold Bonded Corners
- Injection Molded Corners
- Film Splicing
- Drilling / Punching
- Decorative Mylar Application
- Slip Coating

TRIM-LOK, INCORPORATED LIMITED WARRANTY

Trim-Lok[®], Inc. warrants all applicable products to be free from defects in material and workmanship for a period of ninety (90) days from date of purchase. This warranty does not include damage to products resulting from accident, misuse, improper installation or storage, and unauthorized alterations. Trim-Lok's warranty obligation shall be limited to furnishing substitute products for original products, which in Trim-Lok's sole judgement, have proven defective in material or workmanship within the ninety (90) day warranty period. Any implied warranties of merchantability or propriety for any particular purpose, shall be strictly limited in duration to that of the express warranty set forth above. In no event shall Trim-Lok be liable for any special, incidental or consequential damages resulting from the manufacture, sale, or use of these products under any legal theory. Said damages shall include, but not be limited to, lost profits, damage to property, or damages for personal injury. Trim-Lok's liability shall in no case exceed the price paid for the product claimed to be defective.

CATALOG INFORMATION:

The information contained in this catalog is based upon data believed to be accurate. Specifications and products are based upon information at the time of printing and are subject to change without notice and without incurring liability. No guarantee or warranty is made of the catalogs accuracy. Trim-Lok assumes no liability for product failure unless specifically stated in writing by an authorized representative of Trim-Lok. No warranties, expressed or implied, other than Trim-Lok's written limited warranty, will be honored.

RETURNS:

Trim-Lok will not accept returns without prior authorization and an RMA number issued and marked on the return merchandise. Returns may be subject to shipping and restocking charges. Trim-Lok reserves the right to ship and bill up to 10% over and under quantity ordered on all parts.

NOTE:

Some ingredients used in these products, or their component materials, may not be compatible with certain surfaces. These ingredients may cause staining and or other consequential damages.
