

Van Conversions

The roots of Albert Jagger lie in the transport industry, by working with leading designers and vehicle engineers, we provide our customers with an unbeatable range of products that enhance the safety, usability and efficiency of our customers vehicle conversions.

From a complete vehicle conversion to sourcing replacement parts, you'll find everything you need with our wide range of quality vehicle fittings and components. All our products are designed to ensure quality and reliability, with the well-being, safety and comfort at the forefront.

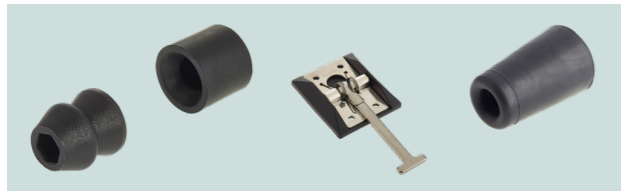

Supply Without Compromise

Transport Hardware

Cargo Control

To protect cargo during transit, several control mechanisms are employed, including lashings rings, ratchet straps, shoring poles and cargo track to ensure the safety and security of transportation of goods and equipment.

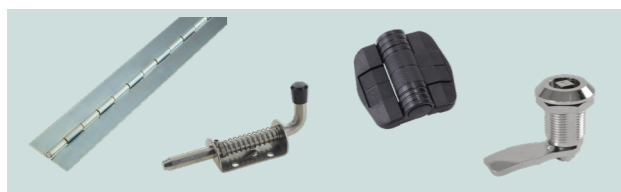

Door Hardware

To ensure functionality, safety and convenience door hardware encompasses various components such as fasteners, door retainers and buffers, securing doors during transit, minimising noise and protecting the doors from damage.

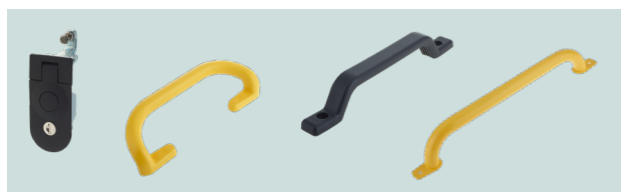

Gas Springs

As an integral component in van conversions, gas springs offer versatile and practical solutions for various applications. Their utilisation improves the ease of operation, safety and functionality of doors, hatches, windows and other access points.

General Hardware

A diverse range of high-quality hardware to suit all van conversions. Our components enable functionality, security and convenience with continuous hinges, spring bolts and quarter turns as prime examples of commonly utilised hardware for van conversions.

Handles, Locks & Latches

Serving multiple purposes, such as access control and security, handles, locks and latches play a crucial role in ensuring that doors, cabinets and compartments within the van are effectively secured and easily operable.

Van Conversions

Our extensive selection of hardware is commonly used in various types of vehicles, including van conversions. Our components play a crucial role in ensuring the safe and efficient operation of vehicles daily. With our reliable products, customers can trust in their durability and cost-effectiveness.

Having built strong relationships with van converters over the years, we possess a deep understanding of the industry. As a result, we offer a vast range of products that cater to both interior and exterior requirements.

Whether its handles lock and latches, or other hardware essentials, our extensive collection has been developed to meet the diverse needs of van conversions.

Kommuter

The latest innovation designed for utility and commercial vehicles <3.5T. The Kommuter range from strategic partner LAGO, offers solutions for travelling tradespeople who require a set of specialised tools to and from the job site, straight from the van.

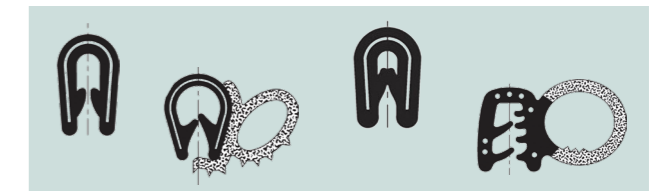

Electrical

Electrical systems such as camera systems and LED lighting improve the safety and security for any van conversion. Camera systems provide clear vision of the vehicle surroundings, enhancing safety whilst LED lights provide lighting to the interior and exterior of the vehicle.

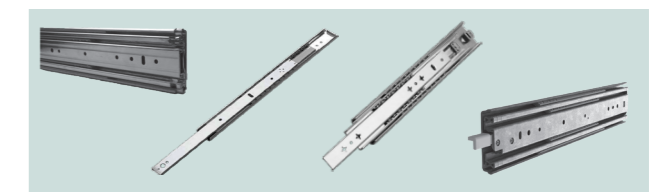

Safety Equipment

Safety equipment ensures the well-being and protection of occupants and minimising potential risks. From handwash units for maintaining hygiene, to first aid kits and fire extinguishers to address medical emergencies and fire hazards.

Sealing Profiles

Boot seal and edge trim ensure proper sealing, protection and finishing of various openings and edges within the vehicle. Serving multiple purposes, sealing profiles can create watertight and airtight seals and protect exposed edges.

Telescopic Slides

Primarily used for the installation of drawers or storage compartments, telescopic slides enable easy sliding movement, allowing users to access items stored within the van with minimal effort, with optimal accessibility to all contents.

Ventilators

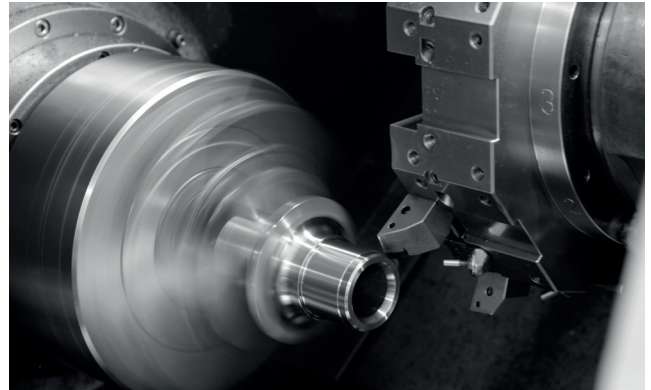

Ventilators are designed to balance airflow and should be considered essential where ventilation is necessary when 'Dangerous Goods' are being transported. Roof vents exhaust hot air and moisture, while floor vents facilitate fresh air intake and circulation.

Supply Without Compromise

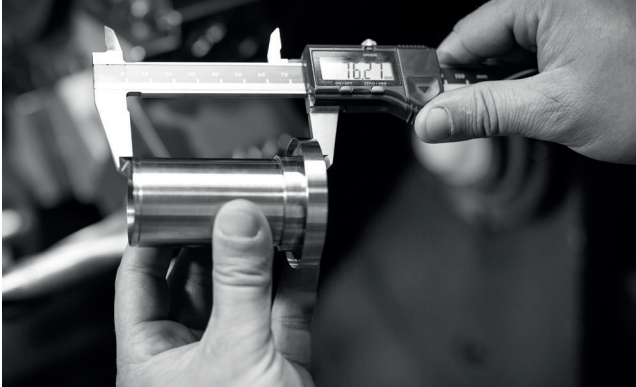

Design & Rapid Prototyping

To strive to be the best is just part of our ethos at Albert Jagger, we use the latest technologies to aid our designers so that we can develop the next generation of hardware and components. We use rapid prototyping so that we can see our developing designs and improve on them.

Manufacturing

As part of the process to ensure that we supply our customers with flexibility, versatility and diversity we have our own in-house manufacturing department. As the market leaders in our industry, we don't just supply parts, we design and manufacture them too.

ISO 9001 Quality

We at Albert Jagger Limited recognise the need to focus on customer satisfaction and that means not only meeting their expectations but exceeding them. One of our key objectives is to continually strive to improve quality of both product and service. To achieve this we maintain quality management system compliant with ISO 9001: 2015.

Customer Service

Our future depends on the success of our customers that is why we like to take a long term view to building relationships whilst delivering an unrivalled service and inspiring trust and confidence. With 130 years of history, we wouldn't be in the position we are if we hadn't looked after and listened to our customers.
